INDEX TO VOL. XVII (B)

AUTHORS' INDEX

Ayyar, P. N. Krishna .. Biology of a new ichneumonid parasite of the amaranthus stem-weevil of South India, 27.

Chauhan, B. S. .. Trematodes from Indian marine fishes, II, III, 97, 133.

Ganapati, S. V. .. An ecological study of a garden pond containing abundant zooplankton, 41.

Kumar, L. S. S. .. Inheritance of flower colour in *Salvia coccinea* Juss ex Murr, 37.

Raghavan, T. S., and Venkatasubban, K. R. Cytological studies in the family Zingiberaceæ with special reference to chromosome number and—cyto-taxonomy, 118.

Rode, K. P. .. On the nature of the Blaini boulder bed, 1.

.. On the stratigraphic and tectonic correlations of the Sirmoor rock formations, Simla Himalayas, 157.

Sahni, B. .. Indian silicified plants, 2, 59.

Seshachar, B. R. .. Volume relations of the nucleus in Apodan spermateleosis, 138.

Singh, Inderjit .. The effect of hydrogen ions and tonic contraction on the viscosity of unstriated muscle, 13.

.. Isotonic extension of unstriated muscle, 20.

.. Surface and interior effects in unstriated muscle produced by various ions, 143.

Reversal effects in unstriated muscle, 149.

Venkatasubban, K. R. .. *See* Raghavan and Venkatasubban.

TITLE INDEX

Amaranthus stem-weevil of South India, biology of a new ichneumonid parasite (Ayyar), 27.

Blaini boulder bed, on the nature (Rode), 1.

Garden pond containing abundant zoo-plankton, an ecological study (Ganapati), 41.

Nucleus in Apodan spermateleosis, volume relations (Seshachar), 138.

Salvia coccinea Juss ex Murr, inheritance of flower colour in (Kumar), 37.

Silicified plants, Indian, 2 (Sahni), 59.

Sirmoor rock formations, Simla Himalayas, on the stratigraphic and tectonic correlations (Rode), 157.

Trematodes from Indian marine fishes, II, III (Chauhan), 97, 133.

Unstriated muscle, isotonic extension (Singh), 20.

Unstriated muscle, reversal effects (Singh), 149.

Unstriated muscle, surface and interior effects, produced by various ions (Singh), 143.

Unstriated muscle, viscosity, the effect of hydrogen ions and tonic contraction (Singh), 13.

Zingiberaceæ, family, cytological studies, with special reference to chromosome number and cyto-taxonomy (Raghavan and Venkatasubban), 118.
